Microfiber cleaning - Sparkling shine for your appliances, automobile, and furniture

There's great hype about microfiber cleaners and every household wants to use these clothes. The term microfiber represents ultra-fine synthetic yarn made from a blend of nylon and polyester. Simply put, **microfiber cloth** comes as a cleaning product which is more than an ordinary wipe and duster. It is made from tiny fibers and offers incredible cleaning of surfaces. Surprisingly, one square inch of each microfiber duster contains approx. 200000 fibers. Thus, making it the finest solution for household cleaning chores to get a pristine finish. The cloth comes with great traits of absorbing liquids and dirt. Look at the below uses of microfiber cleaning tools you may not know.

Use microfiber for upholstery cleaning

Microfiber cleaning cloth is a trending upholstery cleaning apparatus these days. So, you can use it for high-quality cleaning to target the surfaces of chairs, tables, and wooden floors. These clothes are extremely comfortable and durable and are light in weight. The huge benefit of these cloths is that they have natural stain resistance. Thus, using one can provide you with stain-free cleaning of furniture and fabric. The high GSM rating of these cleaners eventually soaks the liquid. So, you can get sparkling shine and ease of dusting work for your household items like:

- Tables
- Sofa set
- Chairs

Use microfiber for automobile cleaning

Being a sensitive owner of a car or bike, you probably want to keep them well-cleaned. Therefore, using the advantage of microfiber cloth can make all the difference. These cloths are highly soft, gentle, and absorbent to deliver top-notch cleaning and detailing. So, after washing your vehicle with water, you can use a splash of microfiber cleaner to remove dust particles. The tiny fibers of cloth will attract dirt and grime from the surface of the vehicle. Thus, offering you the great quality finish to make your automobile shine for:

- Car
- Bike
- Scooty

Use microfiber for appliance cleaning

Unlike traditional cotton cloth, microfiber cleaning cloth is considered best for kitchen appliances. Since appliances and utensils require healthy cleaning to prevent bacteria and germ infestation. So, using this cloth can serve your purpose to have gentle and safe cleaning of appliances. These cloths are lightweight and easy to handle and use for sensitive areas of gas burners. Thus, for hygienic and germ-free cleaning you can use microfiber cleaners for your kitchen. The cloth can absorb water marks and stains from oils to deliver sparkling shine to appliances such as:

- Oven
- Burner
- Exhaust hood
